Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Application No. Applicant(s) 10/532 590 GUGGOLZ ET AL. Office Action Summary Examiner Art Unit David D. Le 3681 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 11 May 2006. 2a) ☐ This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 10-20 is/are pending in the application. 4a) Of the above claim(s) _____ is/are withdrawn from consideration. 5) Claim(s) _____ is/are allowed. 6) Claim(s) 10-20 is/are rejected. 7) Claim(s) _____ is/are objected to. 8) Claim(s) _____ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) ☐ The drawing(s) filed on 25 April 2005 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. Attachment(s)

1) Notice of References Cited (PTO-892)

Paper No(s)/Mail Date 04/25/05, 02/12/08.

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

Interview Summary (PTO-413)
 Paper No(s)/Mail Date.

Notice of Informal Patent Application

Art Unit: 3681

DETAILED ACTION

 This is the first Office action on the merits of Application No. 10/532,590, filed on 11 May 2006. Claims 10-20 are pending.

Documents

- 2. The following documents have been received and filed as part of the patent application:
 - Copy of Foreign Priority Document, received on 04/25/05
 - Information Disclosure Statement, received on 04/25/05
 - Declaration and Power of Attorney, received on 05/11/06
 - Substitute Specification, received on 02/09/06
 - Information Disclosure Statement, received on 02/12/08

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 3681

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The abstract of the disclosure is objected to because it contains legal phraseology

"means". Correction is required. See MPEP § 608.01(b).

Claim Objections

5. Claims 13-16 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claims 10-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10:

Line 11 recites the limitation "the rotation speed". There is insufficient
antecedent basis for this limitation in the claim.

Art Unit: 3681

Claim 14:

Line 3 recites the limitation "the environment". There is insufficient antecedent
hasis for this limitation in the claim

Claim 16:

Line 3 recites the limitation "the environment". There is insufficient antecedent
basis for this limitation in the claim.

Claim 20:

Line 3 recites the limitation "the environment". There is insufficient antecedent
basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 10-20 are rejected under 35 U.S.C. 102(b) as being anticipated by U. S.

Patent No. 5,441,462 to Chan. (hereinafter referred to as Chan).

Claims 10-20:

Chan (Figs. 1-2C; column 1, line 51 – column 6, line 38) discloses a control system comprising:

Art Unit: 3681

A drive machine (i.e., Fig. 1, element 14);

- A transmission (i.e., Fig. 1, element 12);
- A clutch (i.e., Fig. 1, element 16);
- An input brake (i.e., Fig. 1, element 18);
- A control device (i.e. Fig. 1, element 42);
- Wherein the control device makes a selection as a function of selection rules and
 vehicle parameters and variables as to whether the clutch remains engaged or
 disengaged when a gear change takes place from an original gear to an intended
 gear in the transmission (i.e., column 1, line 53 column 6, line 38);
- Wherein, when the gear change is carried out with the clutch engaged, the control
 device operatively synchronizes a rotation speed of a transmission input shaft to
 an intended rotation speed of the intended gear by controlling the drive machine
 (i.e., column 1, line 53 column 6, line 38);
- Wherein the control device carries out the gear change exclusively with the clutch disengaged after an initial starting-up of the drive train (i.e., column 1, lines 53-57);
- Wherein the control device carries out a test to determine whether the gear change
 can be carried out with the clutch engaged and makes the selection based on a
 result of the test (i.e., column 1, line 53 column 6, line 38);
- Wherein the control device carries out the test as a function of vehicle parameters and variables (i.e., column 1, line 53 – column 6, line 38);
- wherein the vehicle parameters vary (i.e., column 1, line 53 column 6, line 38);

Application/Control Number: 10/532,590

Art Unit: 3681

 Wherein the control device operatively synchronizes the rotation speed of the input shaft to the intended rotation speed of the intended gear by using the input brake (i.e., column 1, line 53 – column 6, line 38);

Page 6

- Wherein at the start of a downshift gear change, the clutch remains engaged, and
 the control device operatively drives an actuating element to deselect the original
 gear, determines a time since the driving of the actuating elements, monitors
 whether time exceeds a threshold without the original gear having been
 deselected, disengaged the clutch (i.e., column 1, line 53 column 6, line 38); and
- Wherein the stated threshold is dependent on at least one of vehicle parameters, vehicle variables, and variables which describe an environment of the motor vehicle (i.e., column 1, line 53 – column 6, line 38).

Conclusion

- The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Stasik et al. (U. S. Patent No. 6,997,849) teaches a control for selecting automated
 transmission system shift strategy; wherein the controller will sense vehicle operating
 conditions to command the most appropriate of dynamic shifts performed with the master
 clutch engaged or dynamic shifts performed by disengaging and then re-engaging the
 master clutch.
 - Janecke et al. (U. S. Patent No. 6,893,378) teaches a transmission system and method of operation.

Art Unit: 3681

 Kobayashi (U. S. Patent No. 6,544,142) teaches an automatic transmission system for a vehicle, as shown in Fig. 1.

- Berger et al. (U. S. Patent Application Publication No. US 2003/0054920 A1) teaches a
 method of controlling a transmission, as shown in Fig. 1.
- Kobayashi (U. S. Patent Application Publication No. US 2002/0035010 A1) teaches a transmission system for a vehicle, as shown in Fig. 1.
- Chan et al. (U. S. Patent No. 5,506,771) teaches a control system and method for a semiautomatic mechanical transmission system, as shown in Fig. 1.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Le whose telephone number is 571-272-7092. The examiner can normally be reached on Mon-Fri (0900-1730).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on 571-272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3681

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
